MORE POWER, LONGER. MORE SAVINGS, FASTER.

BLACKBURN ENERGY proudly presents RelGen, an onboard charging system that captures the kinetic energy of the moving truck to create and deliver power directly to your accessories for a faster and fuller charge. By connecting to the drive shaft instead of the engine, RelGen charges up your auxiliary batteries 3X faster than a standard engine alternator. Full batteries gives you the confidence to eliminate engine idling which saves fuel, reduces maintenance repairs and lowers CO2 emissions.

**A 200 AMP DEDICATED CHARGE
CHARGES 60% FASTER THAN ALTERNATOR
ELIMINATES VOLTAGE LOSS**

**ONBOARD HYBRID CHARGING
NO EXTERNAL INFRASTRUCTURE
DOUBLES 12V CHARGING CAPACITY**

**EASY TO INSTALL
EASY TO MAINTAIN
DURABLE**

RELGEN FEATURES

Industrial grade zinc plated steel
Corrosion proof powdered coating steel
Hard coated aluminum
High efficiency power unit
Stainless steel covers
Custom center bearing
Drive belts with advanced blend of EPDM tech

OPTIONAL ADD-ONS (EXTRA FEE)

RelGen Performance Pack
Aluminum Battery Box
2 AGM group 31 batteries
Installation kit
RelGen KERS - (Kinetic Energy Recovery System)
-Control module and proprietary algorithm controls charge
-infinitely programable clean energy generation
-GPS and 2-year data plan
-Wire harness, software and all connectors
