

Truth Consequences

EXIT NOW

When choosing a no-idle system, heading down the right road is critical. Some manufacturers make false claims about their cooling performance – and you get hit with the consequences: Drivers are hot and miserable, units often need to be replaced, and you are frustrated. But with the NITE® Phoenix system, you get real numbers – proven true in a recent independent test.

INDEPENDENT NO-IDLE TEST RESULTS

In an independent no-idle test, our competitor's system produced **58.5%** less Btu/hr than claimed, and was still **45%** less than the **NITE Phoenix**.

	ACTUAL	CLAIMED	% BELOW CLAIMED
Competitor	4,150 Btu/hr*	10,000 Btu/hr	58.5%
NITE Phoenix	7,500 Btu/hr*	7,500 Btu/hr	0%

Choose the NITE – it's truly the best direction.
