

BERGSTROM AFTERMARKET SYSTEMS

**COMFORT AND
RELIABILITY THAT
GO ANYWHERE**

As a global leader in commercial climate control, Bergstrom Standard Products offer the ultimate versatility so you can create the exact climate system you need. From OEM to aftermarket installations. From extreme heat to extreme cold. From military to forestry to just about any niche vehicle out there. It's comfort and reliability that go anywhere.

Bergstrom®

CUSTOM COMFORT

Bergstrom, Inc., a global leader in the design and manufacture of climate control systems to the commercial vehicle industry, created the Bergstrom Aftermarket Systems (BAS) business unit to provide heating, ventilation, and air conditioning (HVAC) solutions to OEM and aftermarket customers across the world that require a flexible and versatile approach to their HVAC challenges. We can find a pre-engineered and fully validated solution from military to construction to just about any niche vehicle out there. It's comfort and reliability that go anywhere.

GLOBAL NETWORK

By combining progressive and proven engineering designs, lean manufacturing principles and a global footprint, it empowers us to respond to local needs with global force.

MANUFACTURING

Bergstrom has positioned engineering resources, supply chain, HVAC testing and state of the art manufacturing capabilities around the globe offering off-the-shelf, quality systems to our customers.

ENGINEERING AND TECHNOLOGY

When it comes to design, our mission is simple-optimize materials and technology to deliver reliable and durable solutions that will stand up to the demanding environments of any vehicle.

AFTERMARKET

Our aftermarket program offers a vast inventory of original equipment manufacturer (OEM) and all-makes aftermarket parts, demonstrating our commitment to be the leading supplier to wholesale distributors.
